## Covid-19 Protocols

Things are going to seem weird for a while, but at least we're here!

Please keep in mind the following so we can keep each other safe and get through this together as best we can!

### 1. Face masks must be worn at all times!

*Wear your provided mask or bring your own! This might be irritating but just remember, we're doing it to look out for each other!!*

### 2. Wash/Disinfect your hands often!

*After you enter the building, before lunch, after lunch, after you leave a customer's house! We're going to need some lotion!!!*

### 3. Maintain 6ft between you and others!

*Keep this in mind on the floor, when going into peoples' offices, in the restrooms, the breakroom - I know you want to hug it out, but try an air 5!*

### 4. If you're sick, stay home!

*Please take your temperature at home before you come in and if you have a fever, are coughing or having trouble breathing, stay put! No sharing!*

### 5. Disinfect your workstation throughout the day!

*Be sure to disinfect your workstation before lunch, before the end of the day, and before anyone else uses it. We will also be disinfecting public areas!*
